QUALITY AND TRADITION

Gorenje has been producing high-quality home appliances for over 60 years. It is committed to development of own technologies and to continuous improvement of its production processes. Drawing on Slovenian tradition and European values, Gorenje remains among the leading home appliance manufacturers in Europe. We are proud of every product that leaves our factories as we are aware that it was produced and tested to meet the stringent European environment protection standards.

OUR HISTORY

We were producers from the very beginning. The Gorenje company was founded in 1950 as a workshop in the idyllic village of Gorenje, Slovenia. With an ambitious and determined team, the young company first focused on the production of agricultural machinery. Inspired by newfound opportunities in the developing home appliances sector, Gorenje produced its first solid fuel cooker in 1958. The fast growing start-up moved its base to the young town of Velenje in 1960 and sold its first washing machine in 1964. The company's rapid growth and success played a significant role in the economic growth and prosperity of the area, providing employment to the wives of miners employed in the nearby lignite mine.

Since our beginnings in 1950, Gorenje grew into a multinational corporation. Drawing from Slovenian tradition and European values, Gorenje remains one of the leading European manufacturers of home appliances. In 6 production centers (Slovenia Head Quarters, Serbia, Czech Republic) and 44 business units abroad, Gorenje employs over 10.000 people. At Gorenje, we are committed to designing and perfecting home appliances of the highest standards with smartly thought out aesthetics and intuitively human technology. We are proud of every single product that leaves our factories as we know that it is produced and tested to meet the highest product and environmental protection standards. But most of all, we are proud to have the ability to improve and simplify the lives of people in 90 countries around the globe.

MAGICALLY SIMPLE. SIMPLY BEAUTIFUL.

Just as a magician produces an illusion by the sleight of his hand, so you can flambé with the greatest of ease.

Everything is possible with the new collection of kitchen appliances created by the famous French designer Ora-ito. They are simple, intuitive and integrate the best that technology has to offer.

To top it all off they are visually stunning and convey a 'wow' effect whether you choose the black or the white collection. Feel them. Touch them. Enjoy the timeless perfection of their design.

MEET ora-ito

The creative French designer has always been known for pushing the boundaries of design to create something that is timelessly aesthetic and simple.

Ora ïto characterizes his style as Simplexity, i.e. an integration of simplicity and complexity. His concepts are bold, defying the established norms. He has received numerous international awards for his designs.

According to Wallpaper magazine ranked him amongst the top 40 most influential designers under 40 years old. He was appointed Chevalier des Arts et des Lettres in 2011.

“ We created something timeless. If I have to design it again after 10 years I would do the same. ”

Ora ito (IFA 2016)

OVENS

Some flour and yeast, just the right temperature and your secret ingredient. Is it bread or is it magic?

HomeMade shape

Abracadabra, perfectly baked!

Inspired by traditional wood-burning ovens, the characteristic rounded shape of Gorenje by Ora ito ovens enables hot air to move around freely. The food is heated evenly from all sides and always perfectly done: crispy on the outside and juicy on the inside

BigSpace

Impress with your creativity

Be the illusionist in your own home with the innovatively shaped Gorenje by Ora ito ovens, which offer increased capacity while maintaining their outside dimensions. Now the optimised airflow circulates at an even greater volume, allowing you to prepare even larger quantities of food.

MultiFlow 360°

You can do it all at once

You don't need magic powers to bake on five levels at the same time. Smartly positioned ventilation openings on the oven back wall together with the unique rounded shape guarantee optimal circulation of heat within the oven for simultaneous baking on many levels without smells or flavours mixing together.

AquaClean

So you can save time for more important things

AquaClean offers great assistance in cleaning of the oven cavity. All it takes is to pour half a litre of water into a baking tray and turn AquaClean on after each baking. In just 30 minutes, the results are visible on the entire surface and the baking trays. Stains and grease are softened and can be wiped away more easily and the oven stays spotless.

DirectTouch

Perfection is a touch away

Intuitive symbols make the oven easy to use and allow freedom to set any cooking parameter according to one's personal preferences. Just the right touch and your delicious meal will be ready!

GentleClose

Let your cooking make the noise

Only a gentle push is enough and the oven door will close smoothly and silently.

COMPACT OVENS

The heat is on. A cloud of steam appears. Add spices and your magic words. The smells are magnificent!

COMBI STEAM OVENS

MultiSteam 360°

Perfectly steamed every time

After the steam enters the oven cavity through multiple openings, a special fan distributes the steam evenly, giving the food a soft and tender feel. Just one water tank will do the trick!

HealthyReheating

Evenly reheated or defrosted

Combi steam oven can be used to reheat or defrost dishes. When the food is reheated, it is not additionally cooked, and it never dries out.

PureSteam

No water, just steam

Thanks to the special steam generator, a cloud of pure steam is distributed all over the oven, without any drops of water that could spoil the food, making it soggy. It is also excellent for defrosting since warm steam evenly surrounds the food without creating hot spots.

WaterTank

Water at hand

The large, practical and elegant water tank is easily accessible and can be refilled even during the cooking process, without ever interrupting it. The 1.3l tank is smartly positioned for easier handling and designed to offer more space and prevent spilling.

COMBI MICROWAVE OVENS

Stirrer Technology

Say goodbye to uneven heating

It's not sorcery, just an advanced microwave distribution system, which heats the food uniformly across the entire volume of the oven and allows the use of a standard-size baking tray in the microwave oven. Conventional turntables and unevenly heated food are a thing of the past.

AquaClean

So you can save time for more important things

AquaClean offers great assistance in cleaning of the oven cavity. All it takes is to pour half a litre of water into a baking tray and turn AquaClean on after each baking. In just 30 minutes, the results are visible on the entire surface and the baking trays.

Inverter Technology

Snap your fingers and lunch is done

Inverter technology ensures the energy is evenly distributed instead of pulsating, thereby shortening the overall microwaving time and lowering the energy consumption. Your lunch will be ready in no time and will retain its vitamins, minerals and fibers.

MultiUse

Simple, casual cleaning

No matter what you are preparing, this oven offers the right solution: grill and hot air for larger cuts of meat, grill and microwave combination for pizzas and multi-level microwave power setting for speedy results. Of course, you can also use it as a conventional oven.

gorenje | oronico

WARMING DRAWERS

Every ingredient is carefully chosen, every detail is well thought through. The plates are warm and the stage is yours!

StayWarm

Keeps your cooking delicious

The magic performance took longer than expected? Don't worry, the StayWarm function will keep your food at a constant temperature of 70°C and ensure it retains its original flavour until the time is right to serve the meal.

AutoDefrost

Healthy defrosting with one touch

Defrosting in the warming drawer is uniform and gentle. AutoDefrost function makes sure the food preserves its nutrients, appealing appearance and structure during thawing.

Yoghurt

When you want a healthy choice

This automatic temperature and time setting will provide optimal conditions for you to conjure a healthy homemade yoghurt in just a couple of hours.

WarmingDrawer

The beauty is in the details

Keep your food and dishware warm with the warming drawer installed under the compact oven. The pair fits perfectly into the furniture element designed for classic built-in ovens and offers convenient and practical functionalities.

Capacity: Set for 6 person/ 20 Dishes in 28 cm/ 80 coffee cups/ 40 tea cups

MICROWAVE

The best magic doesn't take a lot of time. Just a minute or two and the show can begin.

TouchControl

Everything is under your control

The microwave oven can be simply operated by touch and even locked to ensure little hands won't play with it. There are no knobs or buttons, which gives the oven a sleek look and allows easy cleaning.

AutoMenu

The magic spell for simple cooking

A number of preset programs enables even simpler preparation of certain dishes. Just select the type of food and enter its weight, and the oven will automatically adjust the power and cooking time accordingly.

SmartDisplay

One glance reveals everything

With the display that spans over the entire height of the microwave oven you will be able to monitor the cooking progress and track the time until your meal is prepared.

HOBS

Some magicians have a hat, you use pots and pans. And your magician's assistant? It will do its work flawlessly.

TouchControl

Now anyone can have the magic touch

Modern sensor technology allows clear and simple touch control operation literally with your fingertips. The controlsurface is perfectly smooth and easy to clean.

Timer

Never miss the right time

The timer ensures the hob will switch off automatically at the desired time notifying you with a sound alarm.

ChildLock

The kitchen as a safe environment

ChildLock option is excellent for those who have children at home. Leaving them in a kitchen unauthorized has never been safer, since this option prevents them from resetting any parameters.

PowerBoost

Make the most of your time

PowerBoost provides extreme heat intensity to the pot and significantly cuts waiting time. You will boil 2 litres of water in just under 6 minutes, giving you plenty of time to practice your magical performance

BridgeZone

A simple plan for super-sized pots

Magically turn two separate cooking zones into one with just a simple touch. Cooking in large pots and pans has never been easier or more efficient.

HOODS

The air is filled with anticipation. And nothing else. Now, turn on the lights!

AdaptTech

So you can focus on the show

The hood detects the level of impurities and automatically adjusts the fan speed or even stops it completely when it is no longer needed. And you can turn all your attention to your wonderful meal.

LedLight

Set the scene with perfect lighting

LED lighting provides excellent illumination of the cooking hob and adds a touch of elegance to your kitchen. Its useful life is thirty times as long as that of conventional light bulbs, and it saves up to ten times as much power.

P.A.S. System

Silent and efficient

The innovative parametric air suction system redirects air extraction from the central part to the outer edges of the hood. This approach optimises energy consumption, reduces noise and makes air extraction considerably more efficient.

Timer and refresh

Always a fresh kitchen

The hood can be automatically switched off in 10, 20 or 30 minutes. The refresh function is activated every hour and automatically starts refreshing the air for five minutes.

GentleClose

Smooth closing

The GentleClose function enables simple, silent and elegant closing of the pull-out hood. A gentle push is enough for the hood to softly retract to its housing.

DISHWASHERS

The table is empty and all the traces
have been cleaned. Tomorrow, your
magic will start again.

16 place settings

More space than in the magic hat

The fully flexible interior allows for different loading options, while three baskets offer enough space to clean even 16 place settings at a time. Now you can really throw the ultimate party!

AutoProgramme

Spotlessly clean no matter what

No need for special programmes – the single AutoProgramme will adapt to your every need. Advanced sensor technology will optimize the water and energy consumption to make sure your dishes are impeccably clean, whether you just need to rinse a few glasses or wash the greasy pots from Sunday lunch.

15 min SpeedWash

Clean fast so you can slow down

Imagine throwing a dinner party and the dishes from the main course are cleaned in the time it takes to serve dessert. A quick 20 min programme with the SpeedWash function will do your dishes in only 15 minutes. Perfect for handling the volume of dishes created by having multiple guests in the house.

ExtraHygiene

Always a clean baby bottle

This programme includes an additional rinse with cool water, followed by an extended wash with hot water at 70 °C to eliminate 99.9 % of all bacteria. The program that mimics the sterilization process is made for families with babies, for cleaning baby utensils and bottles.

Total AquaStop

Do not worry about water spillage

With the AquaStop safety feature, the dishwasher can be safely left to operate at night as well as in your absence. In case of a leakage or flooding, AquaStop automatically cuts off the water supply while the pump siphons the residual water out of the dishwasher basin. AquaStop remains fully functional over the lifespan of the appliance.

TotalDry

Takes care of itself

After the washing cycle, the dishwasher door automatically opens just slightly to let out excess steam and ensure all items, even plastic ones, dry completely. This magic trick is excellent for quick drying with low energy consumption.
